BRAIDED CORD -- LOKTITE

POLYESTER JACKET WITH A POLYPROPYLENE CORE

Our Braided Cord (Loktite) is made with a polyester jacket and a polypropylene core.
This construction makes the cord strong, while giving it a high abrasion and UV resistance.
The addition of polypropylene to the core helps to keep the cord economical.

We see many diverse applications for this cord , including fishing, crabbing, trotlining, and as sports netting and theatrical trickline. Custom colors are available. Please inquire.
